RE: domain names

January 10, 2012 7:58 PM

Yeah, the DNS needs to be changed. I sent you details. He'd sent them to me earlier this morning, but I hadn't taken care of it yet.

Nope. Sounds fine. I didn't know that it was being changed. So the DNS needs to still be changed?

Joe

On Jan 10, 2012, at 5:21 PM, Kimberly Paternoster wrote:

Okay, the reason I didn't send that one along is that I have an email from Steve from this morning with nameserver information in it (actually, that should go to you now since you are administering the domain name). I hadn't updated the nameservers yet, so once they are updated and the DNS propagates, you will no longer have mail access on my servers. So it's kind of a moot point... unless you want admin access for the next 24-48 hours. J

Perfect. Thanks. What about latsatts.com?

Joe

I think the only one I have access to is the Sextant one (the rest of them haven't been set up yet).

The passwords for everything else are in the LatsPasswords.xls file on the root of the dropbox.

I made you an admin for the Sextant account, so you are good to go now. J

Actually, I guess I should have found out if there are any admin accounts for the domains that were transferred today. If so, can you get me the access info for all of them? I guess my trigger finger hit enter to early!

Thanks.

Joe

On Jan 10, 2012, at 4:24 PM, Joe Morales wrote:

I checked and it looks like everything has transferred correctly. Thanks for your help.

I think the only other thing that I need is access to the admin account for Sextant emails through mail.wickedcode.com.

Thanks,

Joe

Hey you,

I think it should be done by now, but they say usually 15 minutes or so. Let me know if you don't have the domain names, and I'll check into it.

Aw crap... the email address needs to match what is on the account number. What is that email address? Or, can you change it on the account to your email address for now?

Thanks,

Thanks. Here is DJ's GoDaddy account number 34137386. As far as the registrant email, just use joe@seafaring.com.

Thanks for your help.

Hi Joe,

Here's a "checklist" of what to do to transfer the domains.

1. For the domains that currently don't live in GoDaddy, change the registrant email address on record to yourself. Don't change anything else at this point, because they WILL lock the domain and you won't be able to transfer it.
2. At this link <http://www.godaddy.com/domains/domain-transfer.aspx> enter the domain you want to transfer into GoDaddy, and follow through the process. After you've paid for the domain, the email address you changed in #1 will receive an authorization request to transfer with a couple of codes in the email.
3. Login to GoDaddy, then go to this link: <https://dcc.godaddy.com/default.aspx>
4. Under the Domains menu, select "Pending Transfers".
5. With the domain you are transferring, go into the authorization section and enter the codes you received from the email in step #2. You'll be waiting a couple of days sometimes for the domain transfer to complete.
6. For domains that currently live in GoDaddy, please send me the account # for DJ's account as well as the email address for the new registrant. I will transfer all the domains out of my account into the new account.

Please let me know if you need any help at all with navigating through this. It's not easy to figure out initially, but I'm sure you will.

Thanks, and have a great day!

Kim,

DJ gave me a list of domains that you gave to him a while back and on there it has getlatsandatts.com and attitudesailingsociety.com. Are these still active?

Also, DJ has a GoDaddy account and I would like to make sure that all domain names get transferred to this account. I know that there were some issues a while back with domain names being registered or held by people/companies that no longer do business with L&A. I want to make sure the company's exposure is minimal.

Let me know what is required in order to get all the domain names transferred.

Sincerely,

Joe Morales

Hey Joe,

I forgot about this one:

Subscribetomags.com

Domain name in Wicked Code account at GoDaddy. Registrant is listed as Sextant Publishing Inc. I am listed as the administrative, technical and billing contacts.

Talk soon~

Good evening Joe!

Here's what I know (Steve please fill in the blanks):

Sextantpublishing.com, SextantPublishing.net

Domain names in Wicked Code account at GoDaddy. Registrant is listed as Sextant Publishing, Inc. I am listed as the administrative, technical and billing contacts.

LatsAndAttstv.com
LatsAtts.com
LattsAndAtts.com

Domain names in Wicked Code account at GoDaddy. Registrant is listed as Latitudes and Attitudes, Inc. I am listed as the administrative, technical and billing contacts.

Seafaring.com

Domain names in Network Solutions account. Registrant is listed as Bob Lipkin. Admin, technical and billing is Images Web Design in Las Vegas.

LatsAndAtts.com
LatsAndAtts.net

Domain name in Network Solutions account. Registrant is listed as FTW Publishing Inc. Admin, technical and billing is Images Web Design in Las Vegas.

LatsAndAtts.tv

Domain name in Network Solutions account. Registrant is listed as FTW Publishing Inc. Admin, technical and billing is Network Solutions.

I have asked Steve to create an account to host all the domain names in one place (i.e. I have 45+ domain names in my GoDaddy account). I want all the domain names to live in the same place, one login to access all of them. I want them all to be listed under the appropriate corporate name (Latitudes & Attitudes, Inc. or Sextant Publishing, Inc.), with the appropriate admin, technical and billing contacts (i.e. admin can be DJ, on L&A stuff technical can be Steve, billing can be Cheryl or you).

Steve and Joe - please let me know how I can facilitate moving all the domains into the appropriate account. I am here – just let me know.

Thanks, and have a great night.

Subject: domain names

Kim & Steve,

I had a meeting with DJ today regarding the finalization of the company transfer that is happening on the 12th. In an effort to streamline and clean everything up, I need to know what domain names there are with Sextant, Latitudes & Attitudes (new company) and FTW. I also need to make sure that the registration gets moved to the appropriate company & person. When do you think you can get me a complete list of all domains? How long will it take to have those domains transferred?

Sincerely,

Joe Morales
